DETAILED ACTION

Response to Amendment

The rejections under 35 USC 103 as described in the paper mailed on June 3, 2004 have been withdrawn in view of the amendment filed on September 3, 2004 and remarks contained therein. The prior art of record does not disclose an HDS process for reducing the sulfur content of an alkylated benzothiophene-containing hydrocarbon with the claimed characteristics to a level of less than 50 ppm in which the catalyst used in the process comprises molybdenum, nickel, and organic additive on a carrier that has been subjected to a sulfidation step. The cited art does not disclose the use of the specific combination of metals to achieve a result such that the product contains less than 50 ppm sulfur.

The rejection under the judicially created doctrine of obviousness-type double patenting over claims 1, 11, 12, and 16 of US Patent No. 6,540,908 is withdrawn in view of the comments contained in the amendment filed on September 3, 2004. The claims of the US Patent do not include the characteristics of the feed or product as in the current application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Art Unit: 1764

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 7, and 8 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 7-12, and 18-28 of copending Application No. 09/942830. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a process for reducing sulfur in a hydrocarbon by contacting the hydrocarbon with a catalyst that contains an organic additive. The claims in 09/942830 contain a specific organic compound. However, a species anticipates the claimed generic organic additive of the present claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
